In Two Years Five Thousand Claims Have Been Located.

RECORDS ARE WELL KEPT

OIL FOR FUEL IS LAID DOWN AT \$2.47 PER BARREL.

(Special to The Herald.) Goldfield, Nev., Nov. 4.-Claude M. Smith, the recorder of the Goldfield mining district, has had his share in the prosperity of the camp. The office of recorder in a live camp is known to be worth something, but Mr. Smith was fortunate in being elected to the position n the district that probably had more claims located and recorded than any camp in the history of mining. A

er camp in the history of mining. A to his office in the Nixon block cals how well he has served the dist. The records appear to have been to from the start in perfect order. Course he was one of the first men the camp. He came Sept. 10, 1903, on he hauled the first load of lumber resen out of Tonopah. This lumber it into Harry Ramsey's saloon build-and it was where it was piled up in it of that site on Main street that first district meeting was held, the rict organized, and Smith was elected order. This occurred Oct. 10, 1903, and has been twice re-elected. The corresponding he did was to procure ypewriter and uniform paper upon the tirst certificates of location and er legal papers were copied. Each

district organized, and Smith was elected recorder. This occurred Oct. 10, 1905, and he has been twice re-elected. The first thing he did was to procure typewriter and uniform paper upon thich the certificates of location and ther legal papers were copied. Each educated a moment's time. A A. Codd. In this y these books grew until there were in memes volumes. They have been exed in two different ways, and it ossible to turn to any filing wanted a moment's time. A A. Codd. the dury recorder, having a penchant for istics, has figured that 5,000 claims been located in the Goldfield dishabout one-half of this number been conted in the Goldfield dishabout one-half of this number been conted in the Goldfield dishabout one-half of the company are the works, so that the men may be near at hand, but the men look at tempt to reduce wages in the near function of an attempt to reduce wages in the men board of the contract is \$3 a day, and the men board at the men look at the proceder receives \$3 for every look of the crifficate recorded. One dollar of a remitted to the county treasurer, low assessment work is being done not claims, and a record has to be of this; then papers relating to the rollar of the recorded, or which these thereto may desire starting a boarding houses.

BOISE RIVER BLACK SANDS. required to be recorded, or which thes thereto may desire recorded, a great amount of the recorder's ad bring in considerable revenue, stimated that the office has paid mately \$20,000 in two years.

documents recorded in this office a large part of the history

District at Its Best.

however matters have adjusted to a regards all of the 5.0 it is apparent that interest in Gobas not decreased this year. On it ry, every phase of the situation is the top notch of prosperity. Theore people in camp, more gold being more buildings being creeted arer mail full of inquiries about it parts being received than at an ten gallon cans bestrew the camp, me loaded with Standard Oil gase

Fuel Oil Is Cheaper.

. Donnan Reavis of the January dectric power company may have a har new of ctumps to hoe in competition lik his, but meanwhile Goldfield may reve a a bountiful supply of cheap fuel fo ower, and even for domestic purposes

Kendall's Latest Strike.

The Kendall mine is to the front agal ith an important strike, and things at oking up among the Kendall's neights, who have been hopeful one day an scouraged the next all summer. There many properties being worked in the clinity, and some of them besides the undstorm are likely to be successful be re long. But the new strike must be namer if all the rumors mean anything is said that a four-foot vein has been covered on the 30-foot level—everythin that territory appears near the surface

ils is said to be 12 feet wide and carries 200 to the ton.
These figures are doubtless exaggerad, because a few hundred tons of ore ke this would discount the camp's recd, and, while much is expected of, and omised by the Kendall, she is not exceed to be a world beater on any finds ade at the grass roots. The chances that the good news means that a nall streak or pocket of rich stuff will an to the high figures and the balace of the vein or ore body will carry a mdred or perhaps several hundred dolors to the ton. In any event Kendall ock commenced to climb and brokers ere on the exchange during the week ith orders to buy all that was offered a 10-cent advance. It will be remembered that the Kendall was one of the rly successes of the camp, but was quiet

for a period this summer. The Gardner & Oddie lease on the Kendall produced fortunes for several men.

BIG PLACER DEAL CLOSED.

Boise Men Pay \$150,000 for 1,000 Acres Near Meadows.

An important mining deal has just been consummated involving the Rock Flat property four miles below Meadows The property has been taken over by Lee Bunch and L. A. Coate at a valuation of \$150,000, says the Boise Statesman.

This property embraces 1,000 acres of placer ground and an immense gold-hearing porphyry dike. The ground is in a flat in the bend of the stream. It is rich, but heretofore it could not be mined, as there was no way to secure a dump. The stream makes a turn around a sharp tongue of the mountain, and below the basin is has a rapid fall, but this cannot be utilized directly for working the flat above. The plan is to run a tunnel through this neck and make this drain the placer, the tailings all being sent through the tunnel. The porphyry dike is rich in gold carried in seams. The rock is so soft that it is thought it can be placered. The placers carry both monozite and zircon in considerable quantity, as shown by a test made at the government plant at Portland.

The principal owners of the property were A H. Butler, W. E. Webb, and D.

Mr. Bunch has just returned from the mine. He thinks t one of the best he mus ever seen. It is the intention to send in men at o see to continue the tun-

NEVADA-UTAH DOINGS.

Ton in Different Metals.

Captain Ralph Bledsoe has been sending samples of black sand to the government metallurgists at Portland for treatment says the Boise Capital News. He received the following very interesting report yesterday upon 2.7 pounds of sand from the upper Boise river, given in amounts to the ton:

Magnetite, 26.4 pounds.
Chromite, 200.8 pounds.
Garnet, 709.1 pounds.
Monazite, 219.6 pounds.
Zircon, 231.4 pounds.

WYOMING ZINC ORE.

The zinc was discovered at the depth of thirty feet and is gradually widening ut. Those who have seen the property elieve Mr. Morris has run outo a onanza, and there is no question but that ntold wealth lies hidden in the mounains west of this city for the lucky prosectors who uncover it. At all noises

MILL PUT IN COMMISSION.

Plant of Dollarhide Company, Idaho, Has Its Tryout.

C. C. Ruthrauff got back last night from his Dollarhide mines. The mill was started up for a trial run Monday afternoon, in the presence of Professor Arthur Lakes, the eminent geologist, and of E. A. King, who was the controlling owner in and president of the Minnie Moore Mining company under the Rockwell regime, says the Woodriver Times. The machinery ran smoothly and the mill worked satisfactorily. As soon as the belts are stretched and other changes and adjustments usual on starting up new machinery made, the mill will go into eommission. There are over 400 t.s. of ore at the mill, and an eight, and two four-borse teams are hatting between the mine and mill.

The fine shoot of high grade shipping ore is opening up splendidly in, the No. 3 or lowest level, and it is the intention of the management to ship at least four carloads from this level during the present month.

JOINT FEATURE IS ELIMINATED

Arizona and New Mexico Will Not Be Admitted as One State.

BEVERIDGE PLAN FAILS

NO ACTION EXPECTED AT COM-ING SESSION.

(Special to The Herald.) Washington, Nov. 5 .- When the Fifty-eighth congress adjourned it was understood that the joint statehood bill, admitting two new states to the Union, was to be brought forward The principal owners of the property were A. H. Butler. W. E. Webb and D. C. Blake, of Meadows, while Charles T. Barringer of that place negotiated the prevailed that the much-debated legislation would be put through after brief debate. It appears now that this programme will not be carried out, and there is a strong probability that congress will admit only one state, omprising Oklahoma and Indian Ter-

ritory.

When the omnibus statehood fight
When the omnibus statehood fight began it was proposed to create three new states, the one named, a state of New Mexico and a state of Arizona.

before the junket.

During the past summer many influ-

ential senators and congressmen have been to Arizona and to New Mexico, and it is strange to note that these men, who were not junketers, came back with the opinion that New Mex-ico and Arizona should not be joined, and with the further opinion that neither should be admitted to the Union at this time. These men, seeking accurate information, were astonished to learn that the people of Arizona and the people of New Mexiconthat is, the better class of peoplewere not anxious for statehood; were not class of people were not anxious for statehood; were Monazite. 219.6 pounds.
Zircon. 231.4 pounds.
Quartz 578.4 pounds.
The remainder of the sample consists of mixed grains of other material. The magnetite should have a value of \$3 to \$5 per ton, while monozite and zircon, according to prices ruling last year should bring from 11 to 15 cents per pound. The sample also gave a gold assay of .65 ounce per ton.
This would make the value of the sand close to \$70 per ton. It was surface sand and was not supposed to contain much of value.

Zona and the people of New Mexico—that is, the better class of people—were not anxious for statehood; were not anxious for atmicious for admission into the Union. They found them content to remain under territorial government for a time, until they have developed sufficiently to justify congress in granting them separate statehood. They found the conditions in Arizona very different from conditions in New Mexico, and like the people of New Mexico—that is, the better class of people—were not anxious for statehood; were not anxious for statehood; were not anxious for statehood; were not anxious for admission into the Union. They found them content to remain under territorial government for a time, until they have developed ing them separate statehood. They found the conditions in Arizona very different from conditions in New Mexico—that is, the better class of people—were not anxious for statehood; were not anxious for admission into the Union. They found them content to remain under territorial government for a time, until they have developed in the conditions in Arizona very different from conditions in Arizona very different from conditions in New Mexico (and the people of New Mexico (anxious for admission into the Union. They found the conditions in the Union. They found the conditions in Arizona very different from conditions in Arizona very different from conditions in New Mexico (anxious for admission into the Union. They found the Con creating one enormous state of what s now Arizona and New Mexico.

feet wide. There was an imamount of manual labor perand the men for the most bart beavy rewards. The whole ook an interest in Goldfield and as a wild scramble for claimsmins. At one time the supply was equal to the demand and the were pinched.

It is impossible to accurately forecast the result, when the statehood bill make a fight on the floor of the house and the floor of the senate against the joint statehood bill which was brought forward last session and which it is shown smalles of the zinc ore discovered by John Morris in his Rambler claim in the Silver Crown district, twenty-five miles west of Cheyenne. Mr. Beeler says froward last session and which it is understood will again be brought forward last session and which it is shown the ore runs for per cent zinc and the floor of the senate against the joint statehood bill which was brought forward last session and which it is understood will again be brought for ward this winter. Because many of these men have attained prominence in their respective houses, their arguments will come. shown that neither New Mexico Arizona wants statehood at this time congress will not force statehood upo

Separate statehood is out of the ques schors who uncover it. At all points to containing copper, gold and silver can encountered, and it is only a question under present conditions; joint statehood sown sufficiently deep to reach to main veins before Silver Crown will stances, and in view of the sentiment both territories. Under these circumstances, and in view of the sentiment prevailing in Arizona and New Mexico, the problem can be readily solved b admitting one state—Oklahoma with Indian Territory annexed—leaving the other territories to develop,

> "Drunkenness" Cigarette and Tobacco Habits Cured by

There are many people who have taken "cures" for liquor and tobacco they did not receive a cure. people and many others would take to receive a cure with "TRIB." If they knew what a wonderful improvenent "TRIB" makes upon the general ment "TRIB" makes upon the general health. If they knew how many people have been cured and restored to their rightful possessions in life by its use, if they knew the new life "TRIB" is giving mothers, fathers, wives, sisters, brothers and friends of people taking it, if they new that "TRIB" is the one cure that cures with no bad "after effects." Why not start now and lay aside these "habits" and fit yourself for this short life?

We will give you an absolute guarantee to cure you with each treatment of "TRIB." It's our way of doing business. Prince \$12.56.

F. C. Schramm, Doull Drug Co., Cor. 1st So. and Owl corner Main Sts, "where the cars stop." Postorrice." Sole Agents.

The new commercial treaty between the United States and Cuba has made it possible for us to put ten-cent tobacco into a five-cent cigar, as the duty on Cuban tobacco was reduced when the treaty was signed.

It was the "new tariff" that made this quality of cigar buyable for five cents, and that is why we gave it this name-"New Tariff."

You can't forget the name-"New Tariff." But don't wait until you forget we told you that it was a ten-cent cigar for five cents. Smoke one now and you'll pay five cents for your next cigar instead of ten cents.

Stickney's "New Tariff" Cigar is a product of all the modern processes that can be applied to the preparation of tobacco for smoking. And more: The processes of cultivating and curing tobacco are being systematically developed, and improvement in one way or another is produced every day. Certain processes in the ripening and blending of the fragrant leaf have been so recently invented that the "New Tariff" Cigar is the first to embody their results. It is a rich,

even, luxurious and satisfying smoke. For Sale by all Cigar Dealers WM. A. STICHNEY CIGAR CO.
